Dear Candidate,

As discussed, please find below the machine test for automation selenium.

**Write a Script to automate the given scenario:**

**Scenarios**: Need to fill and automate the following test cases :

- **Test Case 1:** Try to submit without filling required fields and **"Labels"** of all the required fields printed on Console.
- **Test Case 2:** Verify all input fields using Soft assertions.
- **Test Case 3:** Verify all input fields using Hard assertions.
- **Test Case 4:** Submit the form after filling all details properly by using XPath only.
- **Test Case 5:** Verify DB entry after submitting the form using JDBC connection.
- **Test Case 6:** Verify Email is triggered or not after submitting the form using assertion on DB considering an email trigger column as email_sent.

**Environment Details:**

- **Test URL:** http://sfwebhtml.sourcefuse.com/automation-form-demo-for-interview/
  User name : sfwebhtml
  Password : t63KUfxL5vUyFLG4eqZNUcuRQ

- **Browser**: Chrome

**Technology:**
Selenium WebDriver (Without any framework), Can include TestNG if want (not compulsory)

**_Note: Please use dummy credentials for Database Testing.  (Test case 5 & 6)_**

**Thanks & Regards,**
